CERTIFIED MAIL  
Receipt No. 928206

Mr. James McLean  
Roseville Packing Company  
3100 North National  
Springfield, Missouri 65803

Dear Mr. McLean:

On March 7, 1978, we wrote you in regard to required payments due for the Federally imposed Industrial Cost Recovery program. To date, we have received no reply as to your intention to pay the \$11.50 owed. While the amount is not large, it nevertheless is a strict Federal requirement that it be collected.

Chapter 30 of the Springfield City Code, Section 30-26.1 authorizes the Industrial Cost Recovery program to which your facility is subject, and further provides that bills are considered delinquent twenty (20) days after the billing is made. It has now been more than twice that allowable time period. The Chapter further provides that an additional charge of five percent be added to a delinquent bill, and that if a bill shall remain unpaid after thirty (30) days from the date of rendition, the property shall not be entitled to receive sewage services from the City. Further, sewer service to such premises may be disconnected, and shall not be re-connected until all past due bills for sewage services are paid in full, together with the cut-off charge of fifty dollars. Under such circumstances, we could no longer certify to the United States Department of Agriculture, that sewage from your facility was being properly treated.

Please contact this office in writing within seven (7) days, and state clearly your intention whether or not to submit payment for the Industrial Cost Recovery program. If you have any questions, please contact us.

Yours truly,

Charles H. Criswell

3100 N. NATIONAL

March 7, 1978

Mr. James McLean  
Roseville Packing Company  
3100 North National Avenue  
Springfield, Missouri 65803

Dear Mr. McLean:

As you may be aware, the recently enacted Clean Water Act of 1977 amended, at least temporarily, the requirements in the Federal Water Pollution Control Act for the Industrial Cost Recovery program. On November 10, 1977, the House - Senate Conference Committee reached final agreement on a number of "mid-course corrections" to the 1972 Federal Law. The provision affecting I.C.R. program was to place an eighteen month moratorium on the collection of payments. This was coincidental with the time at which the City of Springfield would normally have computed payment amounts for all industries subject to the charges. Following this time, both full houses of Congress agreed to the measures and President Carter signed the bill into law on December 27 as Public Law 95-217.

We have asked the U.S. Environmental Protection Agency to supply us with some interim guidelines suggesting how the City can best handle the moratorium and those guidelines should be in our hands within 30 to 45 days. We have been able to determine however, that the effective date of the moratorium coincides with the signing of the law, i.e., December 27. It is clear therefore, that the moratorium does not apply to payments due prior to the law's enactment. The Industrial Cost Recovery program to which your industry is subject calls for billing on November 1 of each year, and the amount billed is based upon discharge volume and loading from the previous November 1 to October 31 inclusive. Our records indicate the following total loading from your facility during the period November 1, 1976 to October 31, 1977:

Discharge Volume, Hundreds of Cubic Feet (ccf)	419
Biochemical Oxygen Demand, (B.O.D.) Pounds	2758
Suspended Solids, (S.S.) Pounds	1263

3100 N. NATIONAL

Mr. James McLean  
Page 2  
March 7, 1978

The charges for each parameter are as follows:

\$0.0082 per ccf of discharge volume  
\$0.0021 per pound B.O.D.  
\$0.0018 per pound S.S.

The total charges applicable to your facility are:

Volume	\$ 3.44
B.O.D.	5.79
S.S.	<u>2.27</u>
Total	\$11.50

Please make your check payable to the City of Springfield, noted for Industrial Cost Recovery - Northwest Plant, and send it to the attention of:

Mr. Robert R. Schaefer, P.E.  
Superintendent of Sanitary Services  
Room 210, City Hall - 830 Boonville

Springfield, Missouri

Dear Toby:

Thank you for the courtesy you extended me at your plant last Tuesday.

In reviewing past correspondence from this office, I note a number of improvements outlined. Most of those listed I have personally seen or have knowledge of through the plumbing inspectors. In review, I am outlining here again that work which needed to be done:

1. Connect the two (2) drains from the processing room which ran out the east side of the building to the sanitary sewer through an approved type sump.
2. Provide a water-tight cover over the blood sump.
3. Connect the drain from the outside cattle-holding pens to the sanitary sewer through an approved type sump.
4. Provide roofing over the cattle pens to protect them and the sanitary sewer from stormwater.
5. Provide curbing along the south and west sides of the cattle pens to divert surface water from them and from the sanitary sewer.
6. Connect the inside cattle-holding area to the sanitary sewer through an approved type sump.
7. Provide a sampling manhole.

I would like to have the opportunity to reinspect your facilities. Our

files indicate that all work should have been completed by this time. I would like to set up our visit when it would be convenient with you. Please contact our office and let us know when you will be expecting us.

I have enclosed the letter of acceptability of discharge that you and the government inspectors requested. I have written it without restriction or contingency based both on the progress I have seen and the anticipation that any work uncompleted will be undertaken without hesitation.

If we may be of any further assistance or can answer any questions, please feel free to contact us at any time.

Re: Roseville Packing

Toby Cloud called today about the improvements required during our investigation of Roseville Packing Company on June 10. Toby stated they were excavating to locate the sewer lines on their property and as soon as these are located they will be able to complete their plans for the necessary improvements. I told Toby we would check with him in a day or two to set a date for plan submittal.

CITY OF SPRINGFIELD  
INTER-OFFICE MEMORANDUM

ATTENTION OF MEMO TO FILE  
DEPARTMENT

DATE July 10, 1972

Re: Roseville Packing

On this date myself and Mr. Ralph Goodwin from the City Health Department met with Toby Cloud at Roseville Packing and outlined the following deficiencies that need to be corrected:

1. The two drains from the processing room that empty out on the ground on the east side of the building must be connected to the sanitary sewer through a sump.
2. Provide a water-tight cover over the blood sump.
3. Connect the drain from the outside cattle-holding pens to the sanitary sewer and provide curbs along the south and west sides of these pens to divert surface water from the sanitary sewer. This connection is to be made through an approved type sump.
4. The inside cattle-holding pens must be connected to the sanitary sewer through approved sump.

We suggested to Toby that he prepare plans for the above work and bring them in for review and discussions prior to actually doing any work.

We agreed with Toby that the work would be completed 30 days from this date, August 10, 1972. I explained to Toby that in the event the work was not completed in the agreed upon 30 days, our letter dated December 7, 1971 to the State and Federal Government

Dear Mr. Huey:

At the request of both your company and the Federal Government, this letter will certify that the sewage from your facility is being discharged to the city sanitary sewer.

In order to be acceptable blood must be diverted to a holding tank to be disposed of rather than into the sanitary sewer.

Your present facilities will be considered temporarily acceptable for the next sixty (60) days, after which time approved blood holding facilities must be in operation in order for your facilities to be considered acceptable.

If we can be of any further service to you, please feel free to contact me.

Yours truly,
